Epoch-a-lyptic

Description

This challenge requires participants to unlock a secret code on a web page. This can be achieve by fuzzing and manipulating form input data.

The participants are presented with a web page containing a countdown clock (see Figure 1). However the clock is currently counting upwards, since the clock is actually just the current Epoch time.

There is a 'submit' button on the page which the participants can click.

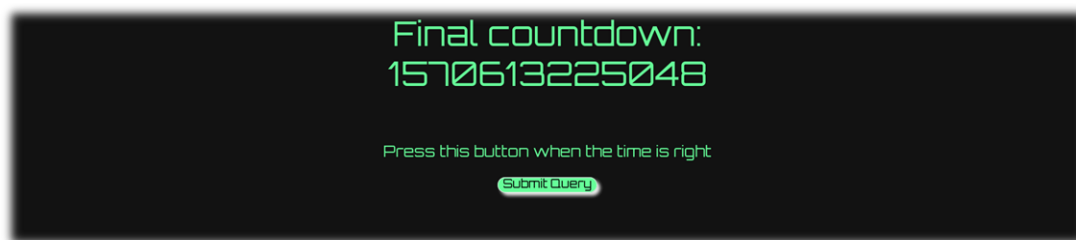

Figure 1: Epoch-a-lyptic web page

Once the 'Submit' button has been clicked a backend script evaluates the form data.

Participants must perform a close inspection of the Epoch-a-lyptic web page and deduce the correct form input data as well as how to submit the data to the backend script.

Keep in mind this challenge has two layers
